

Hi, I am writing to petition 04-160 and to support XM's ability to provide the kind of programming that I demand and deserve. I love listening to my XM satellite radio, I have purchase alot of equipment for my car and home so that I can have the freedom to listen to what ever program I deem necessary. I have been paying for my service for about two years now. XM provides me with digital quality sounds, great dance music and a variety of a whole lot more types of services with no commercials. My local radio stations do not provide me with that service. Secondly I am able to travel around the country and listen to my favorite stations without changing the channel. I am provided with instant traffic and weather for most of the cities in the US. I can understand that the local radio stations may be losing money because of this. But honestly, this is the wave of the future. This is something that I pay for, and is rightfully mine. Who is the NAB to tell me what I can or cannot listen to. You know once I thought this country was free, and I was able to exercise my first amendment rights, but now i question that. It is completely unfair to take XM away from loyal paying customers. I really hope you consider this and not take away the valuable services that XM provides.
